

Build Confidently with Join.

Take the stress out of how you manage project costs, decision timelines, and project teams. Join's simple, intuitive presentation platform allows you to view, pivot, and validate data so you can quickly and confidently create reports and answer questions in seconds. Fewer manual tasks means more time to focus on customer relationships and moving projects forward.

Keep everyone in the loop

Never worry about outdated spreadsheets again. Join facilitates key project decisions and captures information pertaining to decisions all in one place to reduce mistakes and keep everyone on the same page. With Join, everyone is oriented around the same, real-time project data so keeping everyone informed is a breeze.

Save time preparing & pivoting data

Never scramble to find data when questions arise. Join transforms complex project data into personalized, easy-to-use reports and dashboards so you are always prepared for any question with data to support decision making. Instantly and confidently communicate project needs to other decision-makers – all in one place.

Simplify Project Tracking

Join makes massive email threads and hunting for attachment files a thing of the past, providing a central location to capture all the project information provided by the team. This allows you to quickly see what, when, and why project decisions were made - and who made them - on every project because they're all captured in Join.

Ensure happy, repeat customers

Create a better customer experience by removing the friction from collaboration and decision-making. Join complements your business by making it easy for stakeholders to see what decisions are outstanding and how they impact costs and timelines.
